

1.Description of Compost Tea Brewing Bag

Compost Tea Brewing Bag , Food Grade , Nylon Filtering Material

Nylon filter mainly P.P fiber textile molding is made one. Acid and alkali, corrosion resistance. Low resistance, can be repeated washing, high efficiency. Captured by the length of fiber and dust, easy to clean filter efficiency is not affected by cleaning. Good resistance to impact strength.

Nylon mesh have high strength, abrasion resistance, chemical resistance, water resistance, flexibility is good, because the wire diameter uniformity, smooth surface, so the ink through the sex is also very good.

Size: we can produce by customer require.

Color:the color of edge fabrics also can customized.

Can be customize according to customer requirements !
